# LumberLIFT

GREASELESS LOG GRAPPLE

## The world's first greaseless yarder grapple

Go greaseless with LumberLIFT to save time and cut the costs of keeping your grapple greased. LumberLIFT is designed to be low maintenance, with easily replaceable wear parts, so you can keep the focus on hauling wood.

After decades of repairing and rebuilding grapples, 3D Industrial looked for ways to solve the challenge of getting grease into a grapple. The solution was LumberLIFT, a heavy duty grapple that doesn't require any greasing and is built strong for the toughest steep slope harvesting operations.

Other design features include:

- Pins and bushes can be easily replaced and available ex stock
- No arc gouging needed to disassemble.

### CARRIAGE

- Wear plate carriage grill
- Smash plate cushion
- High tensile bump plates
- Heavy duty rope guide rollers
- Optional haulback swivel mounted to carriage

### JAW

- High tensile plate jaw tips and knife edges
- Unique shape will grab any log
- Double bushed jaws for long life

### GENERAL

- Double reeving
- Large wear eyes and horseshoe yokes
- Bolt head protective covers
- High tensile chains
- Long life composite bushes
