

Introducing

The CDL LumberLOAD rotating log grapple range is now proudly manufactured exclusively by 3D Industrial Engineering.

This tried & tested product is built strong for reliable performance and with maintenance in mind. Universal hanger options available.

The range is based around the M Series 852 & 864 grapples with rotator options including:

- Y bracket
- Knuckle link
- Hose Thru link
- Fixed Top

New model coming soon

FEATURES:

LINK

- Universal hanger options available

GRAPPLE BODY

- Centre swivel housing design has new manifold block that carries the hoses to the rams
- Hoses are positioned in line with the rams allowing all 4 hoses and fittings to be the same length
- Removable side plates allowing easy access for hose maintenance
- Pin retainer bolts are protected with a profiled retainer housing to protect the bolt heads and nuts

JAWS

- Hard facing of the jaws is standard on both models

All spare parts are available ex-stock and can be dispatched same day. Please discuss any custom modifications required.
